

Shorts Coin Purchase and Refund Policy - MCN+

Purpose

This document defines how MCN+ Shorts' coin-based unlock system works and the refund rules Subscriber Support applies for coin-related disputes.

Coin Packages and Unlock Pricing

- Coins are sold in fixed packages (50 / 100 / 300 / 650 coins), with larger packages carrying a lower effective per-coin price as a volume incentive.
- The first 3-5 episodes of every Shorts title are free to unlock; later episodes cost a per-episode coin price set by the Content Licensing team at title onboarding (see the Content Licensing and Catalog SOP), typically 10-30 coins per episode depending on production tier.
- An unlocked episode remains permanently accessible to that subscriber's account - coins are a one-time unlock cost, not a rental.

Purchase Process

1. Subscriber selects a coin package in-app; payment is processed via the platform's in-app billing (App Store / Play Store) or direct payment methods where available.
2. Coins are credited to the account balance immediately on payment confirmation. Failed payments credit no coins and are logged for reconciliation.
3. Episode unlocks are deducted from the coin balance at the moment of unlock and are non-reversible from the subscriber's side (no self-service "re-lock" to recover coins).

Refund Policy

- Accidental unlock, reported within 24 hours: full coin refund to the account balance (not a cash refund), one exception per subscriber per calendar month.
- Payment processed but coins not credited (technical failure): full coin credit once Subscriber Support verifies the payment record, target resolution within 2 business days.
- Dissatisfaction with content after unlocking: not eligible for a coin refund - this is disclosed at time of purchase and is consistent with standard digital-content-sale practice.
- Any refund request beyond these categories is escalated to the Subscriber Support Lead for a case-by-case decision, logged with a resolution and rationale for monthly policy review.
